QCCN Portfolio of Tools

<p>QCCN Provider Survey (QPS)</p> <p>Developed originally by the QCCN Quality Improvement and Research Institute (QIRI) in 2010, the QPS is a self-reporting survey that provides information on the quality of care in a program. It is used to assess the quality of care in a program and to identify areas for improvement. The QPS is a 100-item survey that is completed by the program director or a designated representative. The QPS is used to assess the quality of care in a program and to identify areas for improvement.</p>	<p>Program Director Self-Assessment (PDSA)</p> <p>The PDSA is a self-reporting survey that provides information on the quality of care in a program. It is used to assess the quality of care in a program and to identify areas for improvement. The PDSA is a 100-item survey that is completed by the program director or a designated representative. The PDSA is used to assess the quality of care in a program and to identify areas for improvement.</p>	<p>How Do You Measure Up? (HDMU) and Program Improvement Plan (PIP)</p> <p>The HDMU is a self-reporting survey that provides information on the quality of care in a program. It is used to assess the quality of care in a program and to identify areas for improvement. The PIP is a plan that is developed based on the results of the HDMU. The PIP is used to identify areas for improvement and to develop a plan to address these areas.</p>	<p>Quality Child Care Niagara (QCCN) Quality Improvement and Research Institute (QIRI) Survey</p> <p>The QIRI Survey is a self-reporting survey that provides information on the quality of care in a program. It is used to assess the quality of care in a program and to identify areas for improvement. The QIRI Survey is a 100-item survey that is completed by the program director or a designated representative. The QIRI Survey is used to assess the quality of care in a program and to identify areas for improvement.</p>
<p>Research and Program Development Tools</p> <p>These tools are used to assess the quality of care in a program and to identify areas for improvement. They include the QPS, PDSA, HDMU, and PIP. These tools are used to assess the quality of care in a program and to identify areas for improvement.</p>	<p>Quality Child Care Niagara Portfolio of Tools</p> <p>This portfolio of tools includes the QPS, PDSA, HDMU, and PIP. These tools are used to assess the quality of care in a program and to identify areas for improvement. This portfolio of tools includes the QPS, PDSA, HDMU, and PIP.</p>	<p>Tools, Resources and Supports Available to Complement QCCN</p> <p>These tools, resources, and supports are available to complement the QCCN tools. They include the QPS, PDSA, HDMU, and PIP. These tools, resources, and supports are available to complement the QCCN tools.</p>	<p>Program Profile</p> <p>The Program Profile is a document that provides information on the quality of care in a program. It is used to assess the quality of care in a program and to identify areas for improvement. The Program Profile is a document that provides information on the quality of care in a program.</p>

5

Reflection Question

- How can the QCCN Resources and Tools support with your planning for children within the early learning environment?
- How can these resources be used to support families?

6

- What are some strategies your program has in place for organizing the QCCN tools and resources?

7

- Designated area for QCCN resources
- Tracking Sheet
- Binders for QCCN

8

Action Plan

- What does 'quality' mean to you?
- In reflecting upon your program, how are you continuing to improve the 'quality'?

9

Resources

- QCCN Program Forms
