

Linking Your Science & Technology Kit to Ontario's Early Learning Framework: *How Does Learning Happen?*

All child care program staff are invited to participate in a new Science and Technology follow-up training session designed specifically to link the materials within your kit to *How Does Learning Happen?*

Additionally, this follow up training session is designed to give participants the opportunity to network and share their thoughts regarding the implementation of the science project materials and resources. Our Science Project facilitator Jen Havens will guide participants through group work, conversations, and lively discussions regarding successes, barriers, and future programming strategies. Further exploration and hands-on examples using the science project resources and materials and how they align with *How Does Learning Happen?* will provide new ideas for implementation within early learning environments.

All early childhood educators working in Niagara's licensed child care programs who have previously attended the Science and Technology Project Training are eligible to participate in this **free, two-hour training session valued at over \$40** per person to support children in learning science and technology concepts. Thank you to the Ontario Trillium Foundation and Kiwanis Clubs of Niagara for providing the funding for this training.

Session Dates

Please note all sessions will take place at Holiday Inn and Suites, 327 Ontario Street, St. Catharines, 6:00 to 8:00 pm and spaces are limited to the dates below.

- Tuesday April 14
