

RISK MANAGEMENT

for Nonprofit Organizations

Join Frances Yarbrough for an informative presentation related to managing risks within not for profit organizations. Risk management is an ongoing process of identifying and prioritizing risks, developing a risk management plan, sharing the plan with Board of Directors and staff and providing related training to staff members as required and monitoring/updating the plan where necessary. Participants will have an opportunity to explore the various risks that exist within organizations and will gain strategies for making an assessment regarding their organization's level of risk related to the following assets: people, property, income, and goodwill/reputation. The session will provide participants with tools for developing a risk management plan and recommendations for monitoring the plan on an ongoing basis.

Thursday February 12, 2015 • 10:00 am to 2:00 pm • ECCDC, 3340 Schmon Parkway, Thorold (Community Boardroom) • \$75 includes a light lunch

Presenter Bio: Frances Yarbrough, principal of Yarbrough Consulting and Training Services brings many years of experience helping not-for-profit organizations succeed, including board governance, volunteer engagement, fund development, operational management and service delivery. After working 15 years in the non-profit sector, Frances founded Yarbrough Consulting and Training Services and puts her experience to work creating customized strategies that build on a non-profit's strengths to ensure increased capacity and resiliency of the organization.
